

# The Evolution Of Airline Nerve Centers

Zoran Savic | Director Platform Solutions

March 8, 2024

CAE

# Simulator Powerhouse

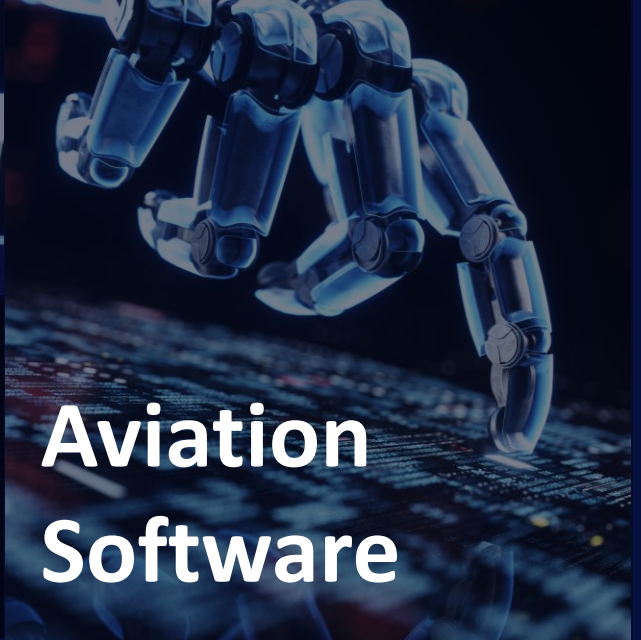

We elevate readiness, **safety** and **efficiency**.

## Flight Simulation

Recognizing an abnormal situation as early as possible

Comprehending the cause and viable options

Executing an **optimal recovery**

Our Markets ► Commercial Aviation | Business Aviation | Helicopter | Advanced Air Mobility

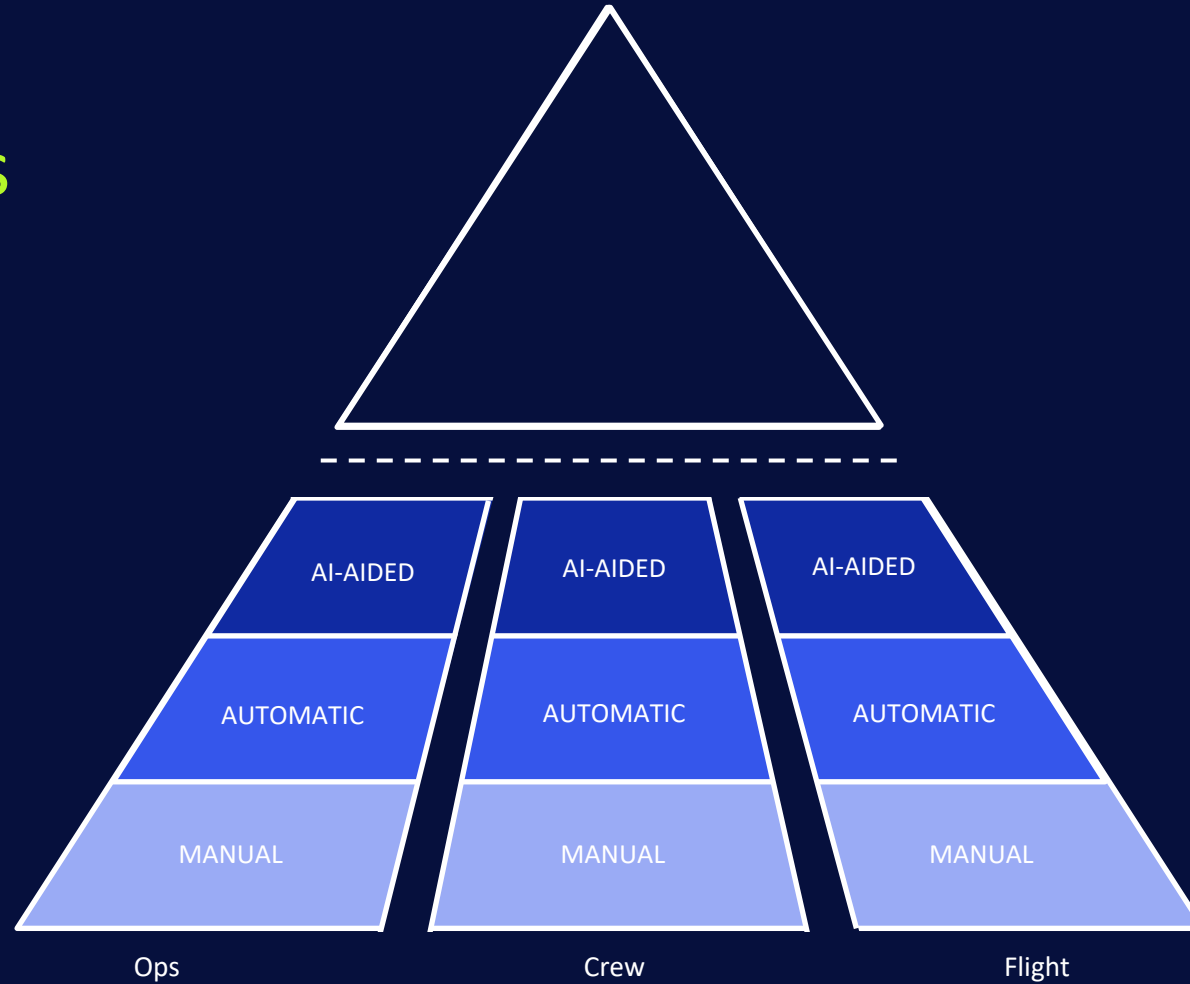

# Evolution of Technology

# Nerve Centers' Evolution

A glance at the development of OCC decision making

No experts needed?

# Nerve Centers' Evolution

What the advanced, largely automated and AI-aided OCC of the future will concentrate on

## Disruption Management

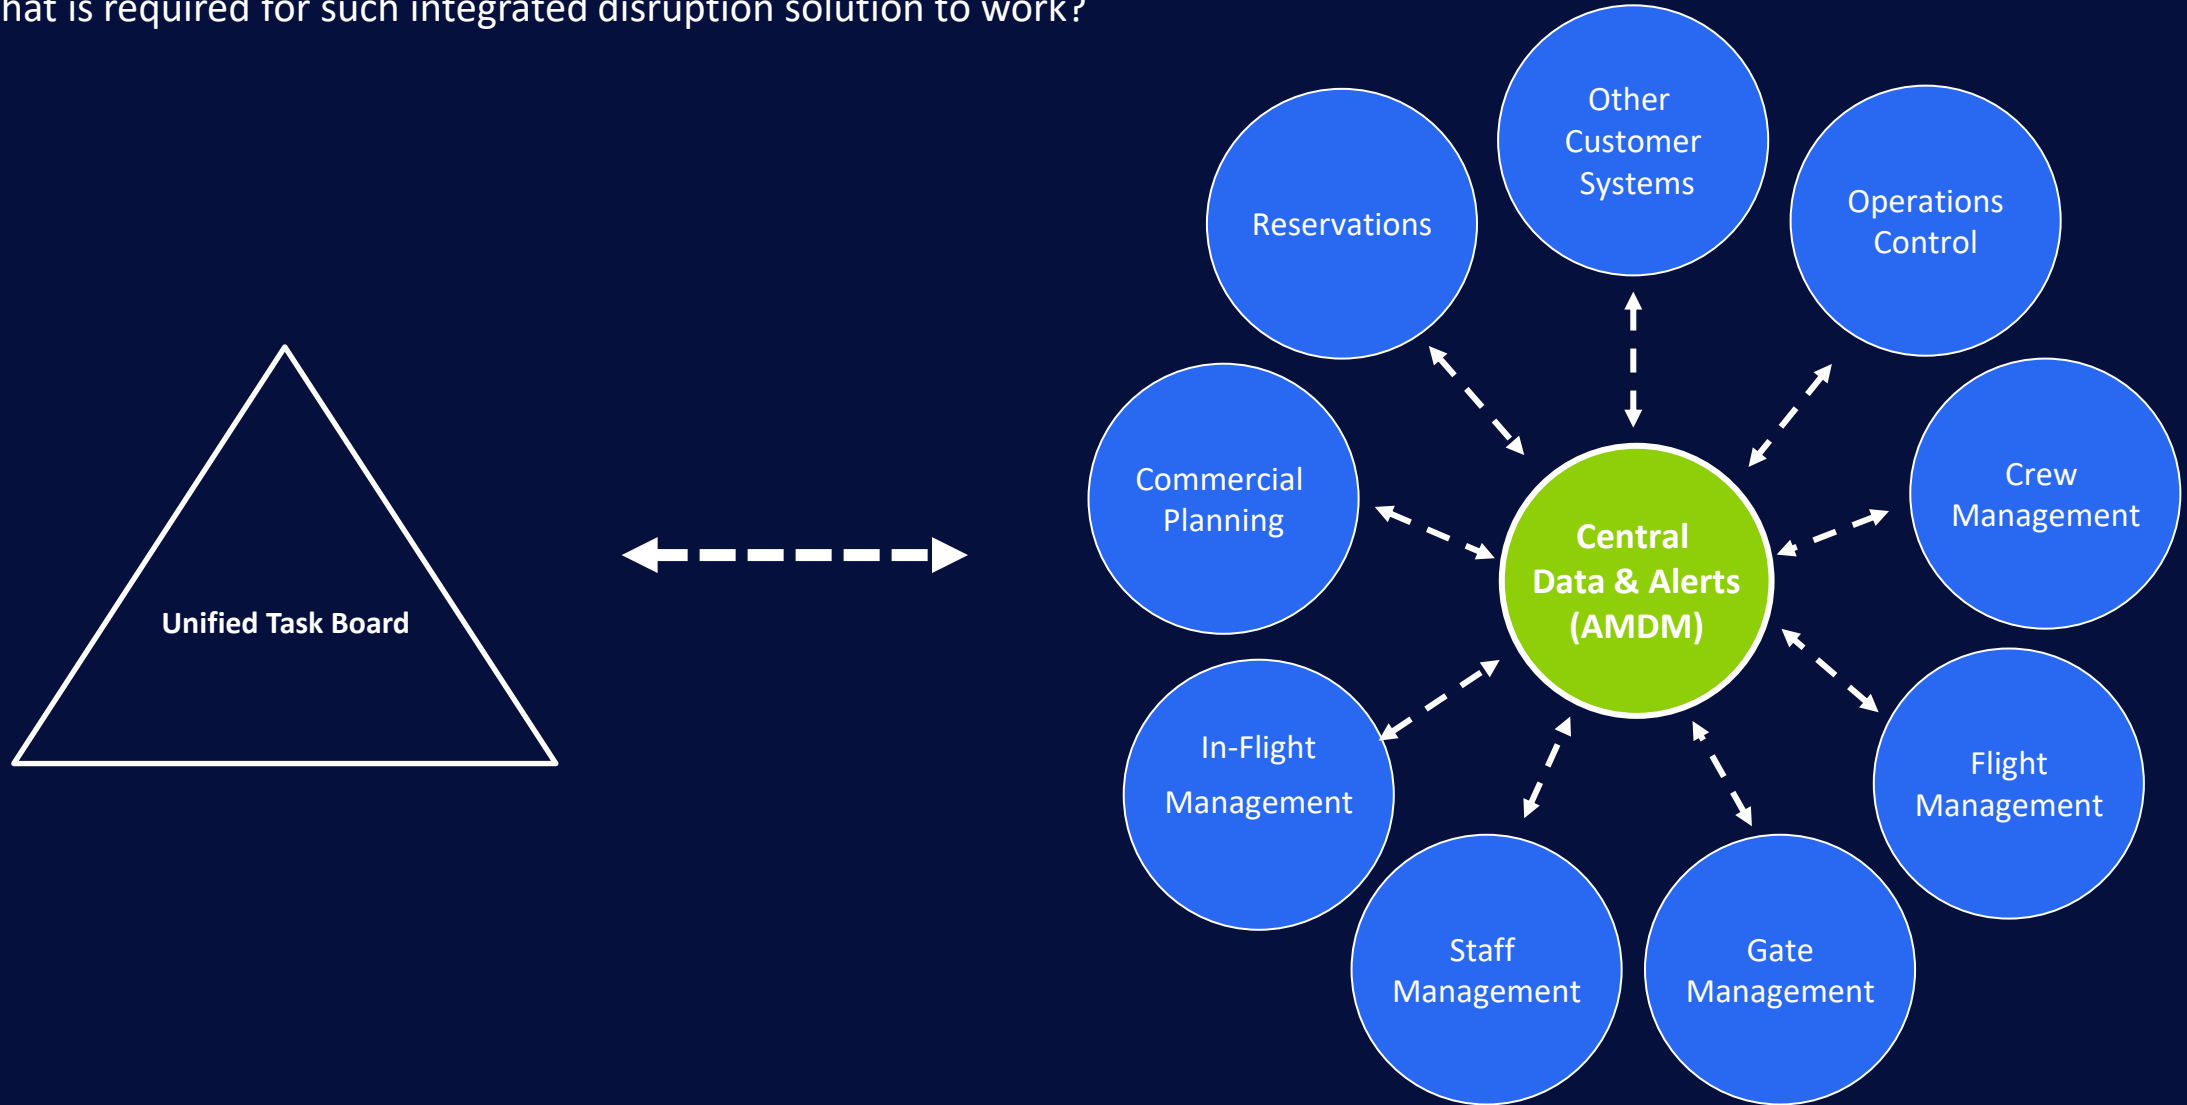

Recognizing an abnormal situation as early as possible

Comprehending the cause and viable options

Executing an **optimal recovery**

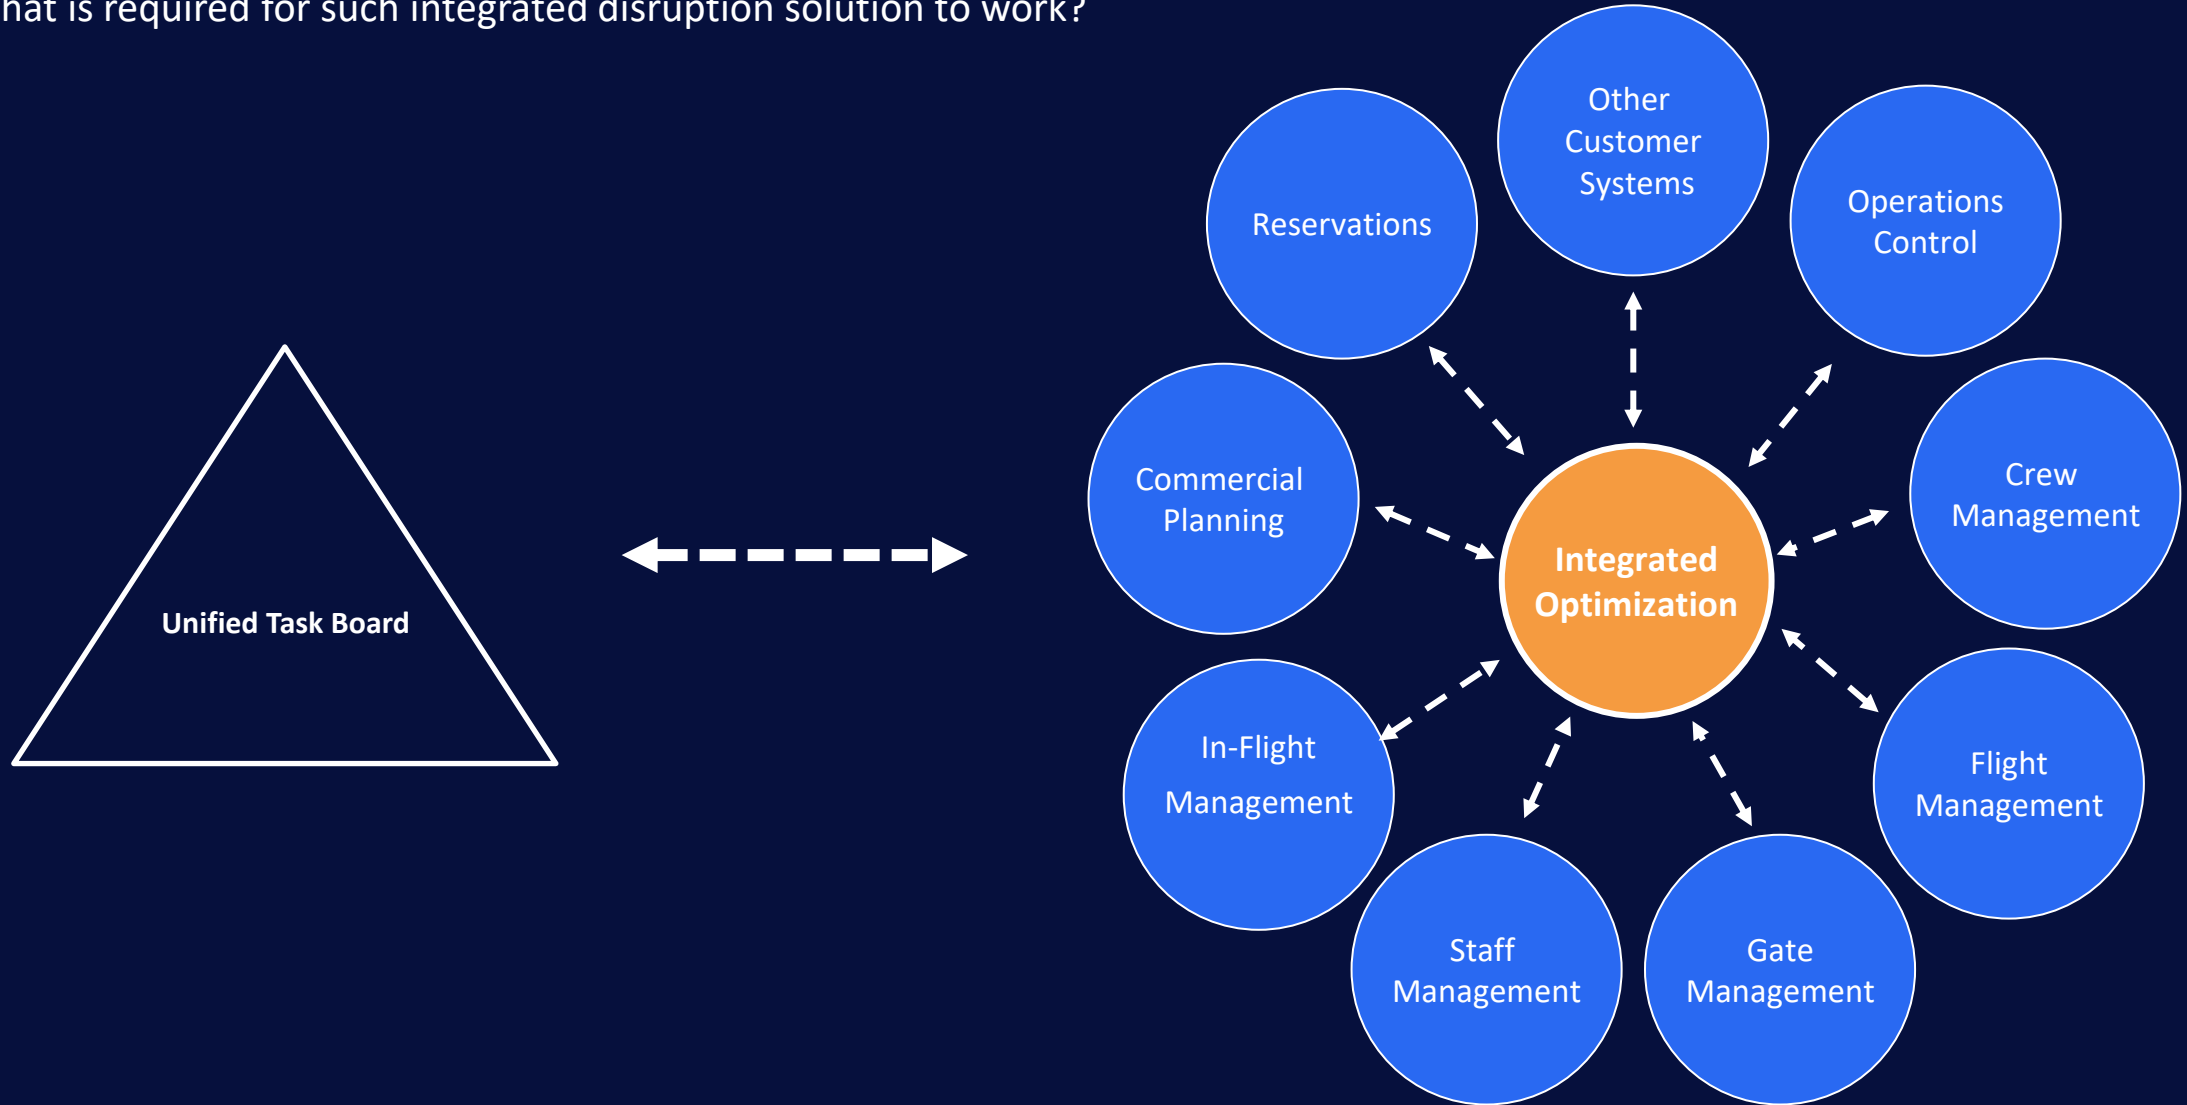

# Unified Task Board

What is required for such integrated disruption solution to work?

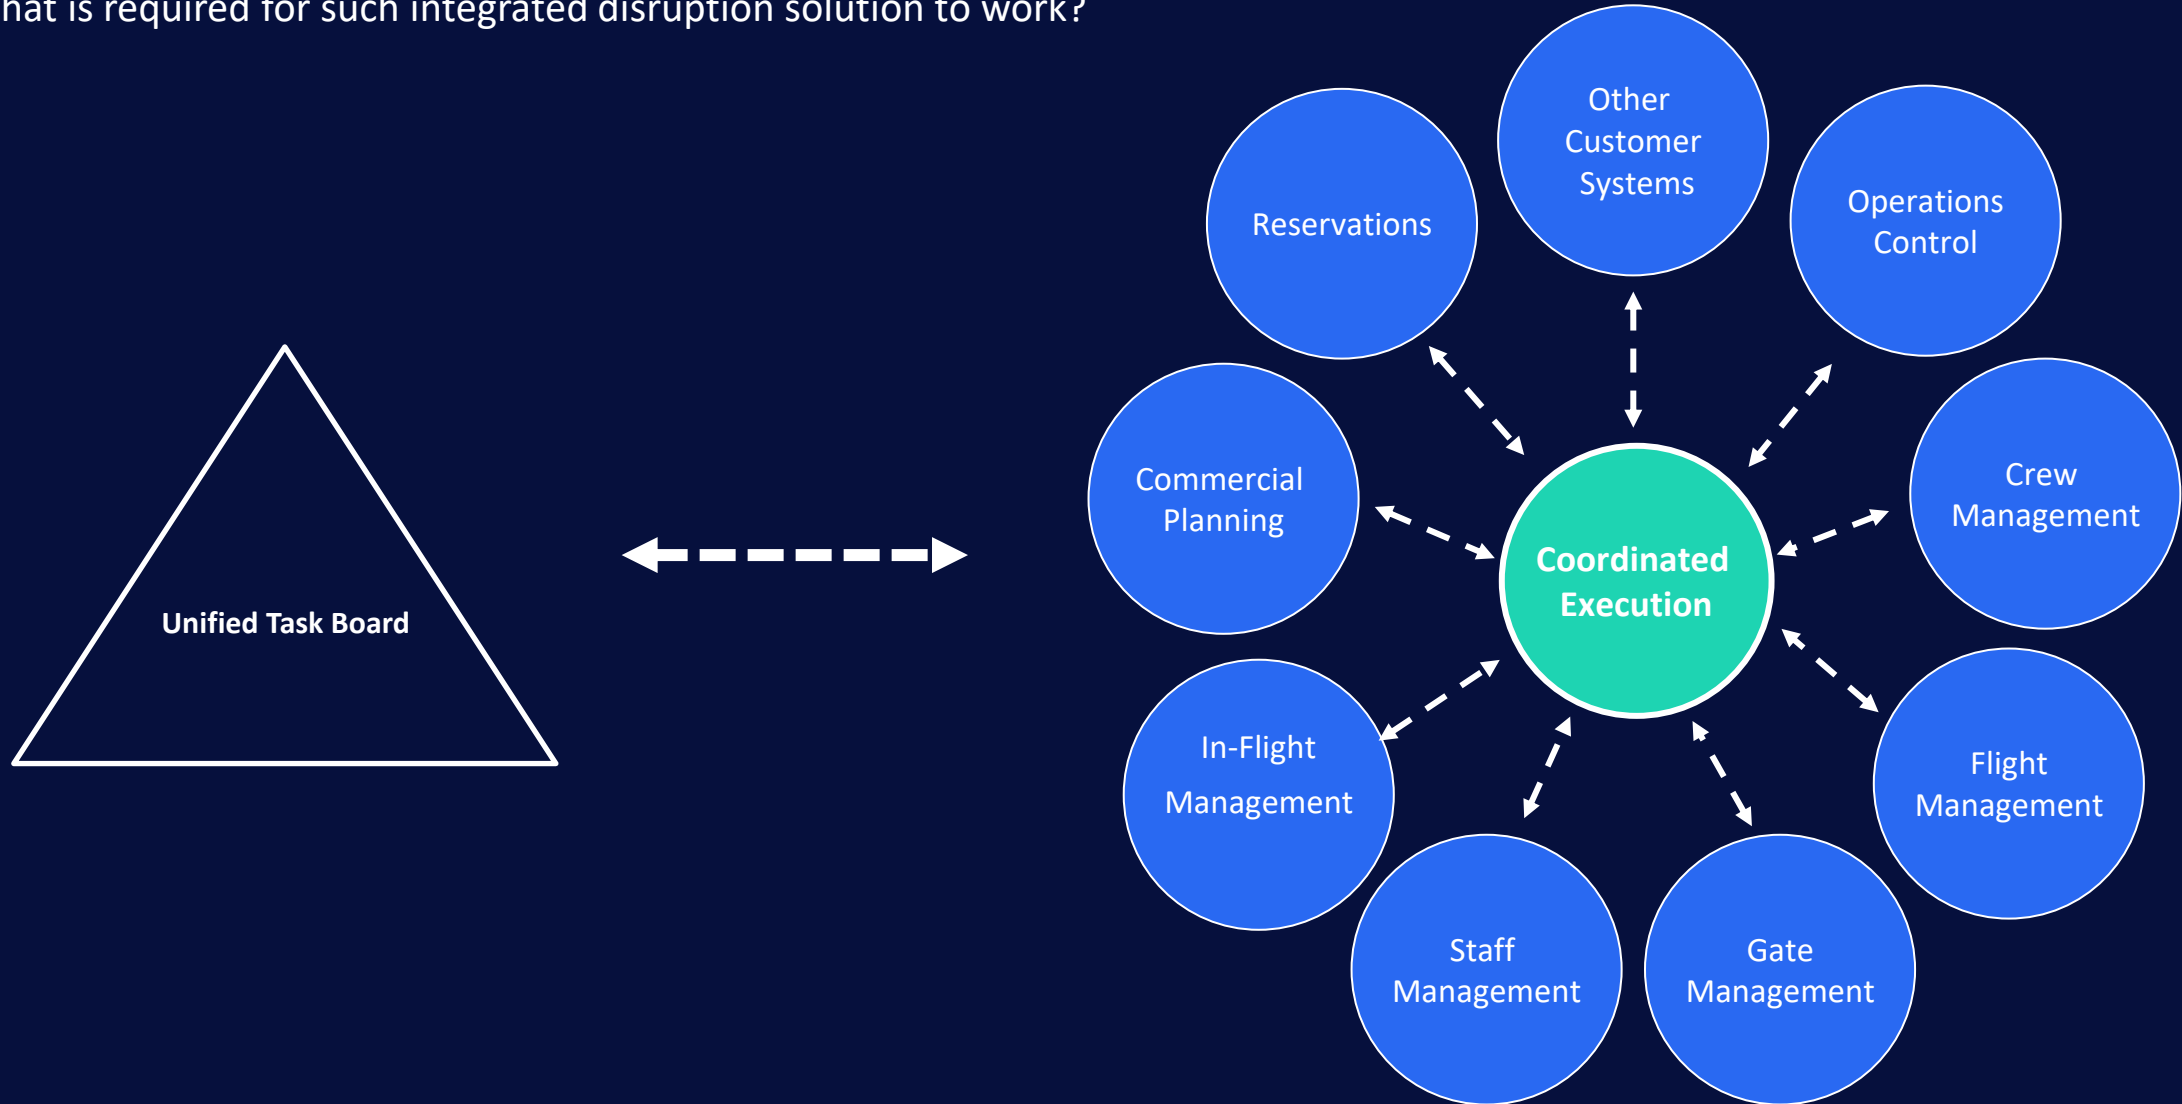

# Unified Task Board

What is required for such integrated disruption solution to work?

# Unified Task Board

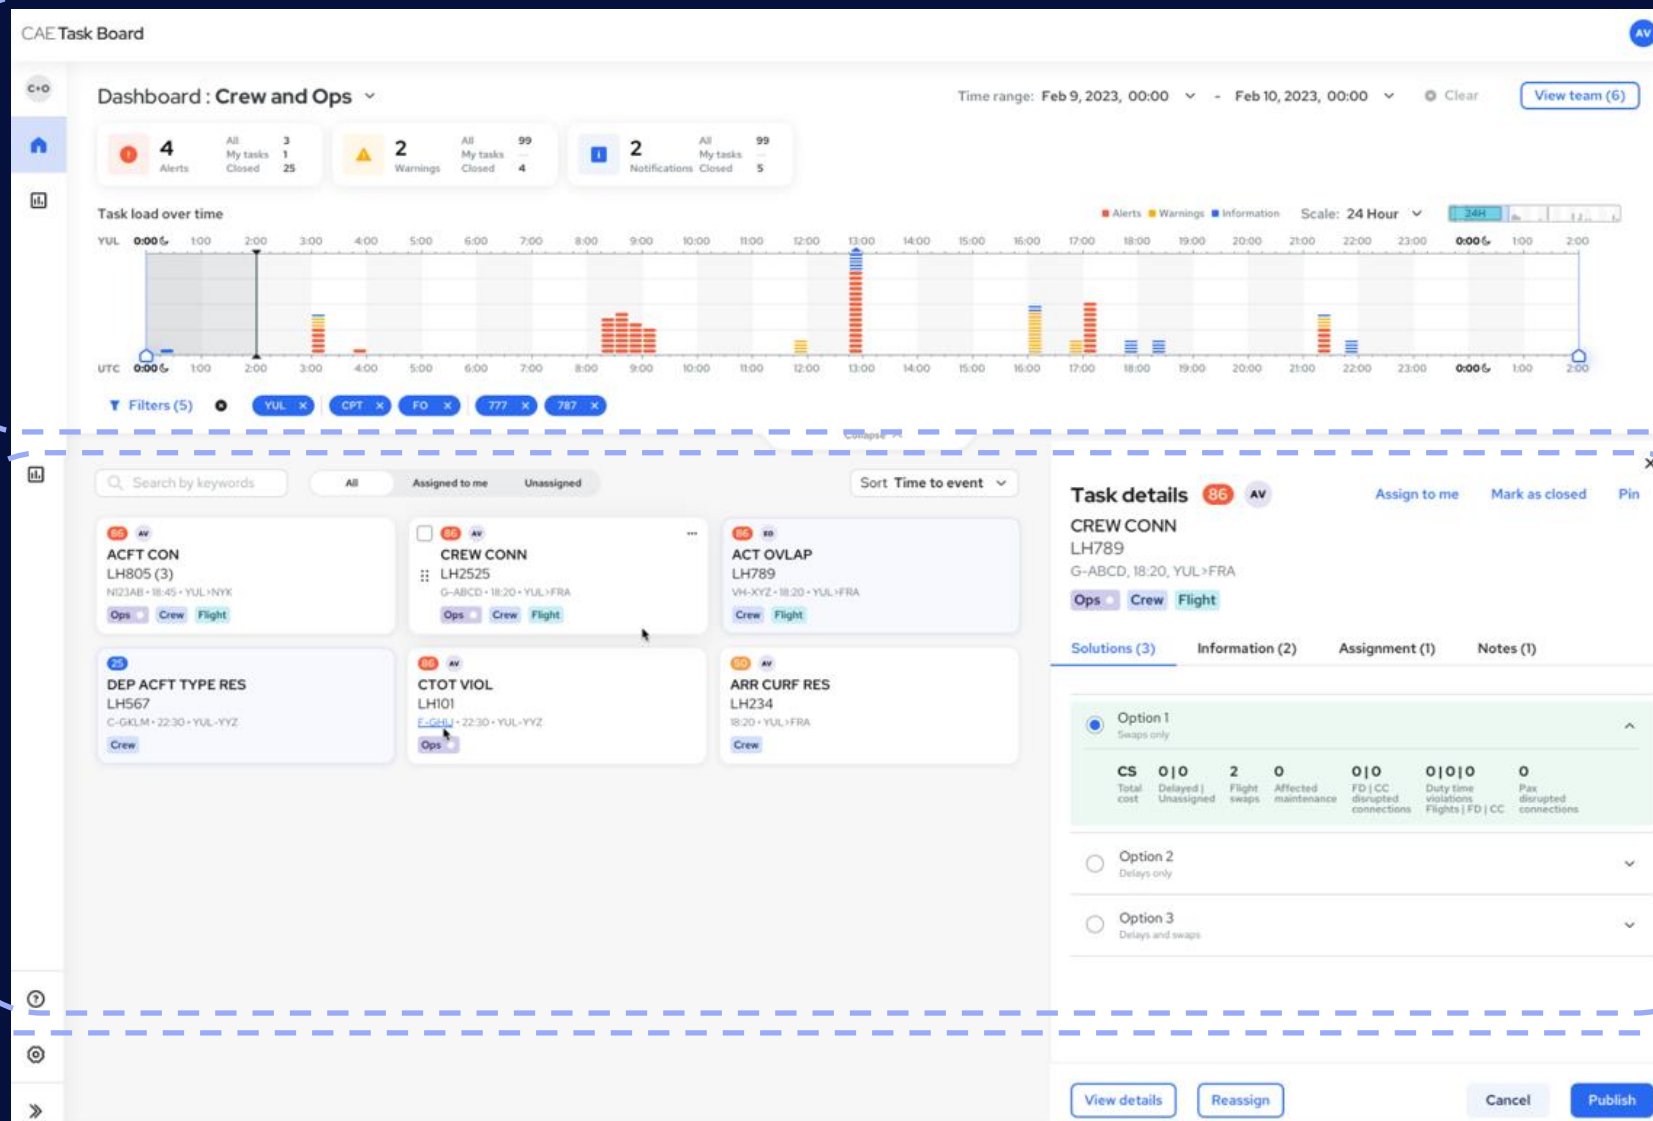

What is required for such integrated disruption solution to work?

# Unified Task Board

What we will launch in only a few months from today

Centrally Identify Disruptions

Situational Awareness

Analysis of Integrated, Optimized Scenarios

Scenario Deep Dive

Coordinated Execution

Collaboration
